

Rishav Saha

Frontend Developer | React.js & Angular Specialist | Expanding into Node.js/NestJS

Gurgaon, India | saharishav53@gmail.com | +91-7530003315 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Professional Summary

Frontend Developer with 5+ years building performant React and Angular applications for B2B SaaS products, including full mobile app delivery in React Native. Currently expanding into backend development with Node.js/NestJS. Known for turning complex, hand-rolled UI into scalable, declarative systems.

Technical Skills

Programming Languages: JavaScript, TypeScript

Frontend Technologies: React.js, Angular 17/18, React Native, Redux, RxJS, HTML5, CSS3, ECharts, Tailwind CSS

Backend Technologies: Node.js, NestJS, RESTful APIs, PostgreSQL, Prisma, Swagger, JWT Auth

Tools: Git, Jest, Postman, Jira, Docker

Work Experience

Senior Frontend Developer | OnlyGood | Gurgaon, India

August 2025 – Present

- Rebuilt Angular forms with Reactive Forms and FormBuilder, tackling one of the toughest parts of Angular to cut boilerplate by 95%, documenting the migration in markdown guides and conducting internal sessions to give every developer a production-ready pattern to build and ship forms faster
- Redesigned cross-module state management with a lightweight shared-service pattern, cutting developer integration effort by 60% and reducing redundant backend calls while keeping data in sync across navigation
- Built the OnlyGood mobile app from scratch in React Native with role-based auth for operators and CXOs
- Built ECharts-powered dashboards with locale-aware PDF/CSV export, reliably rendering large-scale datasets

Software Development Engineer 2 | Appnox Technologies | Noida, India

July 2024 – June 2025

- Built the entire Menu Management system for a B2B travel platform serving the Italian market
- Led the frontend team to consistently hit sprint targets and delivery deadlines
- Cut page load times by 50% through React Query, lazy loading, memoization, and virtualization

Career Break | Upskilling & Personal Health

January 2023 – June 2024

- Upskilled in React, state management, and performance optimization while addressing a personal health matter

Programmer Analyst | Cognizant Technology Solutions | Coimbatore, India

July 2020 – December 2022

- Built e-commerce product catalog components in React and Redux with advanced filtering and search, supporting 50,000+ SKUs
- Built automated test suites with Selenium WebDriver and Java for e-commerce platform quality assurance
- Built SAP ABAP applications to resolve purchase order discrepancies, processing 1M+ invoices

Education

Bachelor of Technology - Mechanical Engineering | Vellore Institute of Technology |

June 2020

CGPA: 8.85

Projects

AccessSuite | Multi-Tenant RBAC Platform

[Live Demo](#)

- Architected and built a full-stack multi-tenant access-control system using NestJS, Prisma, and PostgreSQL, enforcing tenant isolation via request-level guards, JWT auth with refresh rotation, and per-client role-based access control
